Instructions for Sideloading the Counts.Pro App on an Android Device

Step 1: Enable Unknown Sources

1. **Open Settings:**
    - Navigate to the Settings app on your Android device.
2. **Security & Privacy:**
    - Scroll down and tap on "Security & Privacy" or simply "Security" (this may vary depending on your Android version and device).
3. **Install Unknown Apps:**
    - Look for the "Install unknown apps" or "Install apps from unknown sources" option. This is usually found under "Advanced" or "More settings."
4. **Select the Source:**
    - Select the app (e.g., Chrome, File Manager) you will use to download the Counts.Pro APK file and toggle on the "Allow from this source" option.

Step 2: Download the Counts.Pro APK File

1. **Open Browser:**
    - Open your preferred web browser on your Android device.
2. **Go to the Counts.Pro APK:**
    - Go to the URL below to download the Counts.Pro APK:
    - http://counts.pro/wp-content/uploads/2024/07/counts_pro.apk
3. **Download:**
    - Tap the download link to start downloading the Counts.Pro APK file.

Step 3: Install the APK File

1. **Locate the Download:**
    - Once the download is complete, open your file manager app and navigate to the "Downloads" folder.
2. **Open the APK File:**
    - Tap on the downloaded APK file.
3. **Grant Permissions:**
    - If prompted, grant the necessary permissions for the installation to proceed.
4. **Install:**
    - Tap "Install" and wait for the installation process to complete.
5. **Open the App:**
    - Once installed, you can open the app directly from the installation screen or find it in your app drawer.

Step 4: Disable Unknown Sources (Recommended)

1. **Return to Settings:**
    - Go back to the "Settings" app.
2. **Security & Privacy:**
    - Navigate back to "Security & Privacy" or "Security."
3. **Install Unknown Apps:**
    - Find the same option you enabled earlier.
4. **Disable:**
    - Toggle off the "Allow from this source" option for the app you used to download the APK file.
